Subject Index to Volume 33

Brief Communications, Letters, and Errata are denoted by the letters C, L, and E, respectively.

Abstracting and indexing services, common interest groups, 175
—, federal policy (U.S.), 162
—, future, 183
—, humanities, 146
—, products, marketing, 168
—, science and technology, 152
—, social sciences, 157
Abstracts, inclusion in journals, 347(L)
Adaptive systems, information processing, 400
American Petroleum Institute, APILIT database, 60(L)
Association of Information and Dissemination Centers (ASIDIC), 175
Associative search techniques, 308
Author self-citations, classification, 281
Automatic classification, Harris survey questions, 294
Automatic indexing, effect of subject matter, 139
—, evaluation, 60(L)
—, NEPHIS coding, 97
—, term selection, 245

Banking, automation, 349
Behavior, human information processing, 400
Bibliographic databases, humanities, 146
—, products, marketing, 168
—, science and technology, 152
—, social sciences, 157
—, Zipfian distribution of elements, 285
—, Zipfian model, 223
Bibliographies, duplication of Japanese names, 102(C)
Bibliometrics, collection management, 124, 129
—, empirical models, 134
—, quantitative semantics, retrieval language, 3, 347(L)
Book reviews, 61, 109, 142, 349, 371
Boolean queries, and probabilistic information retrieval, 365
—, similarity measures, 8
"Bothsides" thinking, teaching, 76
Brazil, information policies, 203

Cashless society, 142
Chemical literature, online searching, 105(L)
Citation analysis, 233
—, author self-citations, 281
—, library and information science literature, 208
—, matched case-control studies, 333
Citation context, 233
Citation databases, preclinical science literature, 317
Citation ranking of journals, social sciences, 55
Citations, duplication of Japanese names, 102(C)
—, printing errors, 58(C)
Classification, author self-citations, 281
Co-authorship, computational musicology, 38
Collaboration of authors, computational musicology, 38
Collection management, bibliometric models, 124, 129
—, bibliometric models, collection size, 134
—, bibliometric models, weeding, 134
Collection use, differential demand, 124
—, obsolescence rate, 129
Communications technology, future developments, 81(E), 195
—, printed word, 371
Comparison study, online search services, 105(L)
Computational musicology, collaboration of authors, 38
Computer-based training, dialectical thinking, 76
Computer design, 349
Computer intermediary, online searching, 325, 357
Computers, social implications, 302
Content-bearing words in automatic indexing, 245
Cybernetics, bibliography, 407
—, contributions to systems theory, 375
—, literature review, 383

Databases, lack of standardization of journal titles, 105(L)
Decision-making, dialectical processes, teaching, 76
Developing countries, information policies, 203
Dialectical thinking, teaching, 76
Discriminant analysis in automatic indexing, 245
Document retrieval, associative search techniques, 308
Duplication, Japanese names, 102(C)

Economics, journal demand, 321
Edison, Thomas, 60(L)
Editor's note, 68
Electronic funds transfer, 142
Electronic Information Exchange System (EIES), 195
Electronic journal, 195
Empirical systems research, 383
English language, word frequency, 61
Environmental technology, information transfer, models, 82
Errata, 81
Erratum, 81(E)
European Research Letter, 261
—, United Kingdom, 262
Evaluation, information systems, 109
Expert systems, online searching, 325, 357

Federal policy (U.S.), for secondary information services, 162
Frequency distribution, Zipf's law, theoretical foundations, 285
The future of the printed word: the impact and implications of the new communications technology, 371

General Systems Theory, 375

Harris survey questions, automatic classification, 294
Human information processing, 400
Humanities, secondary information services, 146

Indexing, automatic, effect of subject matter, 139
—, automatic term selection, 245
Indexing and abstracting services, common interest groups, 175
—, federal policy (U.S.), 162
—, future, 183
—, humanities, 146
—, products, marketing, 168
—, science and technology, 152
—, social sciences, 157
Indexing languages, comparison, 32
Individualized Instruction for Data Access System (IIDA), 325, 357
Information, life cycle, 44
—, in systems theory, 395
Information and society, 44, 302
Information-based society, 44
Information distortion, 371
Information flow, strategies, 109
Information Industry Association (IIA), 175
Information life cycle, 341
Information policies, Brazil, 203
Information processing requirements of adaptive systems, 400
Information production, 44
Information research management, Poland, 338
Information resources, 44
Information retrieval, Boolean queries, similarity measures, 8
—, evaluation, 92
—, indexing languages, 32
—, probabilistic approach, 365
Information retrieval research, United Kingdom, 262
Information retrieval systems, 109
—, computer intermediary, 325, 357
Information science, thematic analysis, 69
Information storage, text compression, 18
—, videodiscs, 237
Information systems, interdisciplinary, sciences, 115
—, value-added processes, 341
Information systems science, 311
Information theory, evolution, 311
Information transfer, models in environmental technology, 82
Integrated Network System (INS) language, 217
Integration of the sciences, 115
Interdisciplinary information systems, sciences, 115
International Council of Scientific Unions Abstracting Board (ICSUAB), 175
Inverted files, bibliographic databases, Zipfian model, 223

Japanese names, duplication, 102(C)
JASIS, European Research Letter, 261
Journal demand, models, 321
Journal evaluation, social sciences, 55
Journal ranking techniques, social sciences, 55
Journals, inclusion of abstracts, 347(L)
Journal titles, lack of standardization in databases, 105(L)

Knowledge systems, 395

Letters, 60, 105, 347, 372
Library circulation, simulation, 217
Library information systems, models, notation, 270
Library of Congress Subject Headings (LCSH), 32
"Literature obsolescence", example in thematic analysis, 69

Marketing research, scientific and technical information, 265
Marketing secondary information products and services, 168
Matched case-control studies, citation analysis, 333
Mathematical systems theory, 383
MEDLINE, end-user access, 372(L)
—, word frequency, 223
Modeling, library circulation, 217
Models, journal demand, 321
—, library information systems, notation, 270

Journal of the American Society for Information Service

Volume 33, 1982

Contents

January 1982, No. 1

Retrieval Language of Social Sciences and Natural Sciences: A Statistical Investigation
C. Kim 3

Similarity Measures for Boolean Search Request Formulations
T. Radecki 8

Text Compression Using Variable- to Fixed-Length Encodings
D. Cooper and M. F. Lynch 18

Postcoordinate Retrieval: A Comparison of Two Indexing Languages
A. H. Schabas 32

Collaboration in Computational Musicology
M. L. Pao 38

Information Resources as "Goods" in the Life Cycle of Information Production
K. B. Levitan 44

Citation Ranking versus Subjective Evaluation in the Determination of Journal Hierarchies in the Social Sciences
M. D. Gordon 55

Brief Communication
Printer's Devil and Reprint Requests
W. I. B. Onuigbo 58

Letters to the Editor 60

Book Review 61

Information for Contributors 63

March 1982, No. 2

Editor's Note

Notice Concerning Notices 68

Thematic Analysis in Information Science: The Example of "Literature Obsolescence"
T. D. C. Kuch 69

A Replication of the Nelson and Mitroff Experiment in Teaching "Bothsides" Thinking
J. de Geus, F. Mulder, B. Zuurke, and M. M. Levine 76

An Information Transfer Model to Define Information Users and Outputs with Specific Application to Environmental Technology
H. B. Landau, J. T. Maddock, F. F. Shoemaker, and J. G. Costello 82

Optimal Values of Recall and Precision
T. Olafsen and L. Vokac 92

Automatic NEPHIS Coding of Descriptive Titles for Permuted Index Generation
T. C. Craven 97

Brief Communications
Duplication of Japanese Names: A Problem in Citations and Bibliographies
Laurel L. Cornell 102

Letters to the Editor 105

Book Reviews 109

Erratum

Technology and Communication in the Future
M. Kochen 81

Information for Contributors 111

May 1982, No. 3

Problems of Information Services with Respect to Integration of the Sciences
T. Pachevsky 115

Bibliometric Models for Management of an Information Store. I. Differential Utility among Items
R. H. Parker 124

Bibliometric Models for Management of an Information Store. II. Use as a Function of Age of Material
R. H. Parker 129

Bibliometric Models for Management of an Information Store. III. Developing an Empirical Model
R. H. Parker 134

The Effect of Subject Matter on the Automatic Indexing of Full Text
M. E. Rowbottom and P. Willett 139

Book Review 142

PERSPECTIVES ON . . .

Secondary Information Services: Development and Future Introduction
M. Cooper 144

A Perspective on Secondary Access Services in the Humanities
E. M. Mackasy 146

Secondary Information Services in Science and Technology: A Wide-Angle View
M. Cooper 152

The State of Secondary Access Services: Social Sciences
T. Freides 157

Some Reflections on Federal Policy for Secondary Information Systems and Services, 1945–1981
D. E. Berninger 162

Marketing Secondary Information Products and Services
D. W. King 168

The Emergence and Role of Common Interest Groups in Secondary Information
L. W. Granick 175

The Future of Indexing and Abstracting Services
F. W. Lancaster and J. M. Neway 183

July 1982, No. 4

The Electronic Journal: A Progress Report
M. Turoff and S. R. Hiltz 195

Information Policies of Developing Countries: The Case of Brazil
V. Rosenberg 203

Characteristics of a Literature as Predictors of Relatedness Between Cited and Citing Works
S. Bonzi 208

Using an INS Simulation to Forecast Manpower Needs
J. W. Mansfield 217
